

# UCUBE NORTH AMERICA

## *Our North American Upstream database - Complete and bottom-up*

### **Key questions**

What is the current production level for key North American companies? What is the latest wellbore count for the key plays? How do we forecast North American production from 2017-2100? Find answers in our **UCube North America Database (UCubeNA<sub>m</sub>)**, a consistent and up-to-date tool covering both on- and offshore oil and gas activities in the US and Canada.

### **UCubeNA<sub>m</sub> enables you to**

- Understand market trends for the entire North American Upstream industry
- Evaluate production growth and perform valuation analyses
- Compare competitor profiles and performance
- Identify targets for acquisitions or farm-ins

### **Key features**

- Production and resources split into companies and assets
- Play, company and asset valuation
- Asset and company economics, CAPEX scenarios and price forecasts
- Shale wellbore count by play, type and lifecycle
- Asset, company and country factsheets for all assets in North America
- Breakeven prices for each asset

### **Ideal for**

- E&P companies
- Financial market: Investment banks and equity research
- Oilfield service companies
- Consulting and advisory firms
